

Emissions Testing Recertification

Overview

MAS requires that all products found compliant with the provisions of the **MAS Certified Green** program (by either direct emission testing or through a qualified bracketing plan) must be retested or represented by a “worst” case exemplar retest annually in order to account for the variability in raw materials used in those products as well as changes in manufacturing that might alter the emissions of volatile organic compounds (VOCs) from the previously tested and compliant products and/or product lines.

Prior to expiration of the 1-year certification period, manufactures of compliant products must contact MAS of their intent to recertify, otherwise the certification will lapse and the manufactures’ name and product listing will be removed from the **MAS Certified Green** web site www.mascertifiedgreen.com. In addition, all previously agreed to provisions for use of the **MAS Certified Green** logo in association with product labeling, packaging advertising and web site use must cease.

Submitter Obligations

Manufactures of compliant products wishing to continue participation in the **MAS Certified Green** program shall indicate their intent to do so by completing this form along with any requested documentation submissions. Please note that the program charges for product and product line recertification will include the following line items:

Bracketing Plan Review & Revisions

Includes raw material/supplier changes, product line additions
catalog and general documentation/MSDS/spec reviews

(only applicable if changes are made/requested to the original plan) **\$0 to \$1500**

Actual Product or Worst Case Exemplar Testing (for bracketing plans)

Finish products by small chamber (ASTM D5116 and BIFMA M7.1) **\$3,000 to \$3,250***

Chairs and small tables by intermediate or large chamber (BIFMA M7.1) **\$6,500**

Workstations and large tables by large chamber (BIFMA M7.1) **\$11,000**

* 10 to 15% discounts are available to multiple products submitted and tested at the same time

The charges which may or may not be directly applicable are based on:

1. your original product certification
2. product bracketing plan (if applicable)
3. requested modifications to bracketing plan (including option additions and product line expansions)
4. changes in primary and secondary raw materials used (including backer boards, gator type-backings, glues, adhesives, natural and engineered wood substrate types, plastic types, laminate types, batting and fiberglass types, cushion foam types, edge moldings, paint types and exterior finish/coating systems.
5. changes in vendors of manufactured components and materials since past certification selecting
